

JCC Honors Program

JCC's honors program provides challenging academic and enrichment opportunities for highly motivated students with demonstrated academic ability. Honors students work in a community of scholars, engaging in academic dialogue and special projects that provide intellectual stimulation and the opportunity for independent investigation. Honors courses include both special courses reserved exclusively for honors students, as well as opportunities to participate in "blended" courses in which honors students participate with other students while engaging in special activities designed to provide additional rigor and reward. Contact your advisor to discuss your eligibility for these offerings.

Students entering JCC for the first time must have a high school grade point average of 85% or better and must be eligible for college-level English and have a reading score of 80 or better. Current JCC students or returning students with previous JCC credits become eligible for program participation by earning a grade point average of 3.5 or better in 12 or more semester hours of study. To continue in the program, all students must earn cumulative grade point averages of 3.0 or better. Those students who maintain and graduate with a cumulative grade point average of 3.0 or better and complete a minimum of **nine** hours of honors-level work with a minimum of one hour earned through a field experience will receive an honors designation on their transcripts. Field experience may be embedded into certain honors courses, while in other honors courses, students may have an option of completing an additional one-credit experience to fulfill the field work requirement.

Honors students are encouraged to enroll in one honors-level course each semester during their JCC experience. A student who opts not to enroll in an honors-level course for two or more consecutive semesters (excluding summer) will no longer be considered an honors program participant and will relinquish program benefits.

Spring 2010 Honors Courses (*Enrollment is restricted to students in the honors program.*)
